6. Formats of electronic documents, provided by Clearing Members

In order to describe the formats of electronic documents, the following characters are used in encoding WIN-1251:

Letters of Latin alphabet: A-Z a-z

Letters of Russian alphabet: А-Я а-я

Numbers: 0-9

Special symbols: + ? ~ / : () . , ' - SPACE

Type codes

!	Specifies the required number of symbols contained in the string
[]	Optional sequence of symbols
a	It's allowed to use any letters from the above list
n	It's allowed to use any numbers from the above list
x	It's allowed to use any symbols from the above list
c	It's allowed to use any letters from the above list and numbers
d	Designation of the amount of cash funds. The decimal part must be separated by symbol «,»
g	It's allowed to use any letters from the above list, numbers and symbol <_>
Tab	Tab symbol
12!c	Clearing Member Unicode
O	Mandatory field
H	Optional field
GO	Mandatory field within group
GH	Optional field within group

6.1. Request for opening Trade Account

Document format TCA1ADD*

O/H	Transmitted data	Used service words	Format / Value
O	Document title		2!n.2!n.2!nTab12cTab12!cTabTCA1ADD
----->			
GO	Settlement Account	UVR_CODE	5!c
GO	Code of position in cash funds	POSITIONTYPE	1n
GH	Trade Account	TRDACC	12!c
GH	Depo account number	TRDDEPO	12!c
GH	Number of trading section of depo account	TRDDEPO_PART	17!c

* application formation is allowed by own software of the Clearing Member or by using Web-clearing software

Request for opening Trade Account (in the form of file of specified format txt, placed on <https://www.nationalclearingcentre.ru/catalog/020411>).

File Name: Binding_TANNN.txt, where NNN is the document number, assigned by the Clearing Member.

The first line of the file must contain the following unique fields in the following order, stated below, separated by horizontal tab:

- Document date in DD.MM.YY or DD/MM/YY format, where DD is the day, MM is the month, YY is the year;
- Main Unicode of the Clearing Member;
- Document number of the sending organization (till 12 alphanumeric symbols, without spaces);
- Document type: Binding_TA (in capital Russian letters).

Each line of the file must contain the following fields:

Nº	Field description	Type	Dimension
1	Trading section / Securities sub-account T+	Character	0 - 17
2	Trading depo account in NSD	Character	0 - 12
3	Number of trading depo account in NSD/ Settlement Account/ Non-resident Settlement Account	Character	0 - 20
4	Operation type: A – application for opening Trade Account C – application for changing Settlement account in the structure of Trade Account S – application for transfer Trade account in the status «Trade Account is not active» D – application for annulment of Trade Account	Character	1

Notes

1. Field separator: horizontal tab character.
2. Only capital Latin letters and numbers can be indicated in fields 1 and 2.
3. In field 4 for operation C only position in cash funds can be changed.
4. The uniqueness of the date and number must be maintained at least during the operational day.
5. Information on Trade Account registration is provided by separate lines under relevant trading sections 31, 36 or 3U. If the 36th section is not open, "36 is missing" is indicated.
6. When indicating section 3U, only Non-resident Settlement Account can be as position in cash funds.

7. Formats of the electronic documents, provided to Clearing Members, their Clients, Trading Members, Custodians and Clearing banks

Reporting documents are formed in the Clearing System in accordance with the Clearing Rules and sent to Clearing Members and Custodians in form of electronic documents of the category «B».

These electronic documents are the documents formed in accordance with the requirements of the XML language version 1.0.

The structure of the names of XML-file with the reporting document has the form: FFFFFFFF_TTTTTT_SSS_DDMMYY_NNNNNNNNNN.RRR, where:

- FFFFFFFF – the first 7 symbols of the destination organization ID (or MM00001 for the electronic documents intended for all organizations, for example, for exchange information);
- TTTTTT – type of the electronic document, including 3 symbols of the market ID (for example «EQM06» for the Extract from the list of trades, accepted for clearing or «EQM6C» for the Extract from the list of trades, accepted for clearing (clients' trades) etc.);
- SSS – technical ID of the report formation procedure;
- DDMMYY – date for which the report is formed;
- NNNNNNNNNN – unique number of the electronic document in NCC's EDI Subsystem;
- RRR = xml.zip.p7s.p7e (or xml.zip.p7a or xml.zip.p7s or xml.p7a or xml.p7s) – composite file extension, containing from the chain of extensions, meaning the sequence of actions for unzipping (zip), decrypting (p7e), removing digital signature (p7s), removing digital signature (p7a), necessary to receive the initial XML-file.

The full specification of XML language version 1.0 is given in the document ExtensibleMarkup Language (XML) 1.0 (Second Edition), developed by W3C and published in Internet on web-site <http://www.w3.org/TR/REC-xml>.

Each electronic document contains the title in form of text lines and context part, which is lines with the data.

Each line with the data is sequence of the fields separated by the tab symbol (hexadecimal code 09). The lines must end with the combination of symbols «carriage return – line feed» (hexadecimal codes 0D,0A).

The reporting document in XML format can be converted into any format convenient for the recipient (including TXT format with separators) by processing with own back-office software and/or standard software (MS Excel).

The reporting document in XML format can be converted into printed form by opening in Microsoft Internet Explorer.

Forms of the documents converted for printing (on the paper form) are given in Section 6.

7.1. Reports provided to Clearing Members, Trading Members

7.1.1. Extract from the protocol of the execution of trades and obligations to post compensation payments and to pay cancellation payment (EQM05)

XML-file structure:

Node name	Attribute name	Description	Required	Type	Length	Decimals

Field Systemref is not completed for deposit agreement concluded based on consolidated orders to conclude deposit agreements included into the list of offers.

EQM06R is provided to the Clearing Member-Recipient before the procedure for transfer of obligations and Collateral. EQM06P is provided to the Clearing Member-Recipient after the procedure for transfer of obligations and Collateral, field InfType contains the value «9». EQM06P is provided to the Basic Clearing Member after the procedure for transfer of obligations and Collateral, field InfType contains the value «8».

* for credit agreements and deposit agreements when returning credit / deposit, the sum in field «Value» and «Amount» is included accrued interest. For deposits with possibility of replenishment: under the condition of timely replenishment of all previously withdrawn amounts on their target dates of deposit replenishment. For REPO trades / Deposits with CCP with floating rates: the forecast value taking into account the possible change in the value of the indicative rate at the beginning of new interest period.

7.1.3. Extract from the list of trades, accepted for clearing (for the Trading Member) (EQM63)
